| Numbers of other manufacturers (OEM): | 1K0199232J; 1K0199231G; 1K0199231J; 6Q0407183A; 1K0407183E; 6Q0407183; 1K0407183 |
| Weight, g: | 140 |
| Required amount: | 2 |
| No. of items in Package: | 2 |
| External diameter, mm: | 64.0 |
| Inner diameter, mm: | 17.0 |
| Thikness, mm: | 51.0 |
| Material: | The polymeric material |
| Installation axis: | Back Front |
| Fitting Position: | Left / Right |

APPLICABILITY:

AUDI, BMW, FIAT, HONDA, LAND ROVER, SEAT, SKODA, VW

Advantages of silentblock **BC0104 “BAD ROADS”** in comparison with other manufacturers:

1. The internal diameter of the product is reduced, which is 17 mm. (Repair size for levers with long-term of operation).
2. The outer diameter and the wall thickness are increased to exclude the cranking of the part in the lever.
3. Critical places of destruction of the elastomer due to large axial and dynamic loads were detected and eliminated.
4. Based on the analysis of the test results, a special composition of the rubber mixture was developed, which is providing dynamic endurance, fatigue strength, resistance to crack growth.
5. Thanks to these changes, the service life of the silentblock was increased.
